Cooling Technology Institute
Bibliography of Technical Papers

The following papers have been presented at conferences of the Cooling Tower Institute and are listed by categories. Efforts are being made to simplify our filing system. The new order number is in the first column with the old order number in parenthesis after the title. This will help in cross referencing numbers. Reproduced copies of these papers are available from the CTI office, PO Box 73383, Houston, TX 77273. Please order by the new order number. Papers are priced at $10/each, plus processing fee. Prepayment is requested on all orders $25 or less. Due to the total number of papers in CTI’s possession any paper written before 1990 (with exceptions) is considered “Historical” and not listed in this printed document. A complete listing can be found on our website – www.cti.org.

ANALYSIS METHOD
TP10-19 .......... A Systematic Approach to Performing, Documenting and Reporting Inspections of Field Erected Cooling Towers
Casey Yurkovitch, GEA Power Cooling, Inc.; Philip Poll, OBR Cooling Towers, Inc.

TP10-14 .......... Automated Feed of Patented Aseptrol CW Oxidizing Biocide Provides “Best Practice” in Delivery of Chlorine Dioxide to Small-Scale Systems
Keith Hirsch, BASF Corporation; John Byrne, Richard McCaffrey, BASF Catalysts, LLC

TP10-05 .......... Complex Structural Analysis Simplifies Repair Phasing in Restoration of Hyperbolic Cooling Towers

TP10-01 .......... Your Cooling Tower Project On Time, On Budget
David Suptic, David M. Suptic, P.E. LLC

CLEANING SYSTEMS
TP10-08 .......... Cooling Tower Water Conservation
Jon J. Cohen and Henry A. Becker, H-O-H Water Technology

TP99-15 .......... Online Cooling Tower Cleaning and Water Division
Cliff Roy and John Foy, Syncrude Canada LTD; Lloyd Olson, International Cooling Towers

TP98-13 .......... New Technology Improves Tower Basin Cleaning
Randy Delenikos and Bill Leizear, LAKOS Filtration System

TP96-02 .......... Online Cooling Tower Cleaning
Mark Coyle and Gordon Barksdale, American Inland Divers, Inc.

CONVERSION
TP99-14 .......... Conversion of a Crossflow Tower to a Double-Level, Multi Fan Counter Flow Tower
Vincent Wiltz, Cooling Tower Specialist

TP97-02 .......... Com Ed Co. Byron Generating Station Unit 1 Crossflow to Counterflow Conversion
James O. Smith, Com Ed Co.; Mark Muder, Marley Cooling Tower

COOLING TOWER WATER BLOWDOWN TREATMENT
TP07-07 .......... Zero Blowdown for Cooling Towers
Sam Owens, Chemico International, Inc.

TP06-14 .......... Copper Removal From Cooling Tower Blowdowns
Christopher Howell and David Christophersen, Crown Solutions, Inc.

TP06-02 .......... Cooling Tower Blowdown Limitations: Case Studies of New Wastewater Permit Limits
Jennifer Cunningham, Air Liquide Large Industries US LP

TP01-10 .......... Hero Process - Recovery Reuse of Cooling Tower Blowdown and as a Preconcentrator for ZLD Application
Charles H. Fritz, PE, Black & Veatch Corp; V.J. Nathan, Aquatech Int'l Corp

COOLING TOWER WATER CHEMISTRY
TP12-06 .......... Forward Osmosis Applied to Evaporative Cooling Make-up Water
Peter Nicoll, Neil Thompson, Modern Water PLC
TP08-21 .......... A Low-Cost, Safe, Effective Halogen Disinfectant for Cooling Towers ................................................ 2008
Rodney Herrington & Susan B. Rivera, Miox Corporation

TP08-19 .......... Dolphin "Pulsed Power" Cooling Water Treatment ............................................................................... 2008
David Alley, Clearwater Systems; Paul Puckorius, Puckorius and Associates

Daniel M. Cicero, Nalco Company

TP08-05 .......... The Application of Solid Water Treatment Chemistry for Cooling Towers ........................................... 2008
Fred Lattin, and James Heimert, APTech Group, Inc.

TP07-06 .......... Cooling Tower FRP Color Considerations ............................................................................................. 2007
Clinton Smith, Strongwell

TP06-18 .......... Development of an Online Multicomponent Water Treatment Analyzer ............................................... 2006

TP06-16 .......... Optimizing Industrial Cooling Water System Performance With Proper Monitoring and Control ...... 2006
Jean M. Gucciardi, Gucciardi Consulting, Inc. and Loraine Huchler, P.E., CMC, Martech Systems, Inc.

TP06-12 .......... Advances in Cooling System Treatment, Monitoring and Control ......................................................... 2006
Daniel M. Cicero, Nalco Company

TP06-08 .......... Realizing the Full Potential of Your Cooling Tower Lime/Soda Ash Blowdown Softener ................... 2006
Robert Strandberg, Covanta Energy and Terry McCoy, ChemTreat, Inc.

TP05-19 .......... Effective, Chemical-Free Microbiological Control for Industrial Cooling Water Systems........... 2005
Joanne Kuchinski, Linda Rusznak and Edward Beardwood, Ashland Specialty Chemical

TP05-03 .......... Actives Based Monitoring and Control for Improved Cooling System Management and Performance 1999
Michael G. Trulear and John Richardson, ChemTreat, Inc.

TP05-01 .......... Halogen Stable Alkaline Cooling Program ............................................................................................ 1999
Dave Ritz and Gary Geiger, BetzDearborn Inc.

TP99-07 .......... Tweaking-The Art and Science of Successful Cooling Water Treatment ........................................... 1999

TP99-03 .......... Laboratory Development of Novel Multifunctional Polymers for Cooling for Water Use .................... 1999
Ingrid Brase and Joseph Pasapane, National Starch and Chemical Co.;
James H. Belcher, Alco Chemical Company

TP98-02 .......... Making the Best Choices in Water Treatment Additives ................................................................. 1998
Roy Manley, BetzDearborn, Inc.

TP95-08 .......... Maximizing Cooling Tower Cycles of Concentration ........................................................................ 1995
Robert J. Cunningham, Chemisis Inc.

TP94-11 .......... A Mechanistic Study of Corrosion Inhibition by Phosphonates ....................................................... 1994
B.J. Hepburn and P.J. Sullivan, FMC Corporation

TP94-04 .......... Monitoring Biological Control in Cooling Systems ........................................................................... 1994
Gary G. Engstrom and Jack C. Tully, Grace Dearborn

TP94-03 .......... Development of High Cycle Cooling Water Treatment Program .......................................................... 1994
Binu S. Khambatta, Daniel A.Meier and Michael A. Kamrath, Nalco Chemical Company

TP92-12 .......... Alkaline Phosphate - A New Direction for Phosphate Cooling Water Treatment .......................... 1992
Christine M. Stuart and Phil Eastin, Nalco Chemical Company

TP91-09 .......... Laboratory Development of Novel Multifunctional Polymers for Cooling for Water Use .............. 1991
Ingrid Brase and Joseph Pasapane, National Starch and Chemical Co.;
James H. Belcher, Alco Chemical Company

CORROSION

TP13-14 .......... A Synergistic Combination of Advanced Separation and Chemical Scale Inhibitor Technologies ...... 2012
Jasbir S. Gill, Ph.D., Nalco Company; Yupo J. Lin, Ph.D, Argonne National Laboratory
TP07-23 .......... A New Closed System Treatment Program for Industrial Applications...................................................... 2007
    William Beer and Rosa Crovetto, GE Water and Process Technologies

TP07-21 .......... New Liquid Biocide Products for Specific Industrial Water Treatment Requirements............................ 2007
    Christopher J. Nalepa, Farrah Azarnia and Tina Craft, Albemarle Corporation

TP07-08 .......... Corrosion-Induced Concrete Deterioration and Rehabilitation of Natural Draft Hyperbolic ................. 2007
    Cooling Towers
    Leandro Etcheverry, Structural Preservation System

TP07-03 .......... Cooling Water - Optimal Control of Admiralty Corrosion Utilizing Multiple Halogen Sources................. 2007
    Gene Dombrowski, Chemtreat, Inc.; John Zimowski, Dupont

TP06-06 .......... Improving Localized Corrosion in a Complex Cooling Water System...................................................... 2006
    Michael H. Dorsey and Arthur F. Brumm, DuPont; Kevin Daigle, ChemTreat, Inc.

TP02-15 .......... Corrosion and Biofouling Control in a Refinery Cooling Water System Using Sewage Water.............. 2002
    as a Make Up
    Abdulmohsen Almajnouni, Saudi Arabian Oil Company; Arif Jaffer, Baker Petrolite

TP97-14 .......... Elucidation of Components of Aromatic Triazole Demand in Cooling Water Systems and...................... 1997
    Development of More Environmentally Friendly Yellow Metal Corrosion Inhibitor
    Narasimha M. Rao, Donald A. Johnson, and Frank F. Lu, Nalco Chemical Company;
    N.P. Nghiem, Oakridge National Laboratory

TP96-14 .......... Corrosion Inhibition of Ferrous Metal in Soft Water Under Cooling Water Conditions........................... 1996
    Colin Hogan, FMC Process Additives Division

TP96-12 .......... Analyzing Corrosion Rates of Copper for Open Re-circulating Systems.............................................. 1996
    Gary Caplan, Diversey Water Technologies Ltd.

TP96-10 .......... Cathodic Protection of the Palo Verde Cooling Towers........................................................................... 1996
    William R. Schutt, Matcor, Inc.

TP94-13 .......... The Control of Ferrous Metal Corrosion in Cooling Water by a Novel Phosphonate Corrosion................. 1994
    Inhibitor
    David A. Little, Wayne A. Mitchell and E.S. Lawson, Grace Dearborn

TP94-10 .......... Pitting Corrosion of Cooling Water Systems.......................................................................................... 1994
    Mark A. Lisin, P.E. and Thomas M. Laronge, Thomas M. Laronge, Inc.

TP91-14 .......... Update on White Rust Corrosion and Control........................................................................................ 1991
    Keith M. Johnson and Joseph B. Mihelic, Drew Industrial Division

TP90-08 .......... An Alternative Oxidizer, Bromine Offers a Northeast Chemical Plant Improved Corrosion.................. 1990
    and Fouling Control
    Mark J. Giusto, Drew Industrial Division

TP89-11 .......... Investigation of Alternative Inhibitor Programs for Highly Corrosive Alkaline Waters......................... 1989
    Greg Simpson and Richard Murtagh, Burmah Technical Services, Inc.

TP89-01 .......... Reducing Copper Corrosion and Discharge via a Novel Inhibitor and Applications Program................... 1989
    Orin Hollander and Charles Shelton, Betz Industrial; Ronald Griffin, City of Tallahassee Electric Dept.

TP87-14 .......... Corrosive Water - A Brazilian Reality...................................................................................................... 1987
    Jose Otavio Silva, Messias Candido Amaral and Flavio Bianchi, Aquatec Quimica, S.A.

DRIFT

TP12-09 .......... Alternate Chemical Analysis for Drift Losses Measurements.............................................................. 2012
    Michel Monjoie, Monjoie Cooling; Eugene Culver, McHale & Associates, Inc.
Vincent Ganzitti, Hamon

William C. Miller, Brentwood Industries, Inc.

Jan Cizek and Ludmila Novakova, CTU In Prague

Dudley Benton, McHale & Associates

TP09-16 .......... Meteorological Considerations in the Design of Plume Abated Cooling Towers ........................................ 2009
Kenneth W. Hennon and David Wheeler, CleanAir Engineering

William C. Miller, Timothy E. Krell, Brentwood Industries, Inc.

TP05-12 .......... An Economical Solution to Cooling Tower Drift ................................................................................... 2005
G.C. Pederson, Frank Power and Arthur Braren, KIMRE, Inc

TP03-08 .......... Cooling Tower Emissions Quantification Using The Cooling Technology Institute Test Code ............ 2003
ATC-140
Kenneth W. Hennon and David Wheeler, Power Generation Technologies

TP99-13 .......... A Non-Metallic Air Cooled Heat Exchanger for Cooling Tower Plume Reduction ........................................ 1999
David M. Suptic, The Marley Cooling Tower Company

TP98-16 .......... The Relationship Between SP and HGBIK Drift Measurement Results - New Data Creates a Need... 1998
for a Second Look

TP98-08 .......... Cooling Tower Plume Abatement at Chicago's O'Hare Airport ............................................................. 1998
J.D. (Doug) Randall, P.E., The Marley Cooling Tower; Michael C. Long, P.E., Black & Veatch; Romesh K. Kansal, P.E., Dept of Aviation, City of Chicago

TP96-05 .......... Prediction of the Plume From a Cooling Tower ..................................................................................... 1996
Kazutaka Takata, Kiyoshi Nasu, and Hiroyuki Yoshikawa, Shinko Pantec Co., Ltd.

TP94-16 .......... Drift Eliminators and Fan System Performance ..................................................................................... 1994
Dr. Bryan R. Becker, P.E., Assoc. Professor of Mechanical Engr., Univ. of Missouri; Larry F. Burdick, P.E. Project Engineer, The Marley Cooling Tower Company

TP94-01 .......... Drift Testing - Scale Up From Test Cell To Field Acceptance Test....................................................... 1994
David Brill, Black & Veatch; Joe H. Lander, Florida Power Corp.

TP93-07 .......... Simultaneous Comparison of the CTI HBIK and the EPA Method 13A Isokinetic Drift Test .......... 1993
Procedures
Michael R. Whittemore, Brentwood Industries, Inc.; Thomas E. Weast, Midwest Research Institute

TP93-01 .......... Plume Abatement and Water Conservation With The Wet/Dry Cooling Tower ........................................ 1993
Paul A. Lindahl, & Randall W. Jameson, The Marley Cooling Tower Company

TP92-10 .......... Reduction of Cooling Tower PM10 Emissions Due to Drift Eliminator Modifications at a .......... 1992
Chemical Refining Plant
Thomas E. Weast, P.E. and Nicholas M. Stich, Midwest Research Institute; Gordon Israelson, P.E., Westinghouse Electric Corporation

TP90-12 .......... Comparison of Two Isokinetic Drift Measurement Methods ................................................................. 1990
Paul Lindahl and O.L. Kinney, The Marley Cooling Tower Company

TP87-08 .......... An Economical Solution to Cooling Tower Drift ................................................................................... 1987
George C. Pedersen, P.E., Kimre, Inc.; V. Keith Lamkin, P.E., Engineered Processes, Inc.; Mike Seich, The Dow Chemical Company

TP86-01 .......... Comprehensive Drift Measurements on a Circular Mechanical Draft Cooling Tower ............... 1986
Karl Wilber, Environmental Systems Corp; Ken Vercauteren, Arizona Public Service

DRY COOLING

TP13-05 .......... Air Cooled Steam Condenser Test Laboratory ....................................................................................... 2013
Mark Huber and Jean-Pierre Libert, Evapco, Inc.

TP07-04 .......... Effects of Wind on Air-Cooled Condenser Performance .............................................................. 2007
John S. Maulbetsch, Maulbetsch Consulting; Micael N. Difilippo, Consultant

TP06-09 .......... Enhancement of Air Cooled Condenser Operation in Power Plants ....................................................... 2006
ENERGY EVALUATION

TP10-16 .......... Water/Energy Nexus, Comparing the Relative Value of Water Versus Energy Resources .........................2010
Jennifer Hamilton, Tom Bugler and John Lane, Evapco, Inc.

TP10-15 .......... Enhanced Cooling Tower for Colder Water, Energy Savings and Reduced Evaporation .........................2010
Jarrell Wenger, Engineering Economics, Inc.

TP08-02 .......... Evaluating Your Cooling Tower ...........................................................................................................2008
Richard DesJardins, DesJardins Consulting

TP07-22 .......... Variable Frequency Drives: Operation and Application with Evaporative ..............................................2007
Benjamin Cohen, Baltimore Aircoil Company

TP01-07 .......... Cooling Towers and VFD's .....................................................................................................................2001
Rick Foree, Danfoss Drives

TP00-12 .......... Developing the Worth of Colder Water in a Steam Turbine Generating Station .........................................2000
Thomas H. Hamilton, P.E., Consulting Engineer

TP96-03 .......... Variable Speed Fan Drives for Cooling Towers ....................................................................................1996
William F. Immell, The Marley Cooling Tower Company

TP91-10 .......... Strategies For Improved Cooling Tower Economy ..................................................................................1991
Steve Adams, Ecodyne Cooling Tower Services; John Stevens, Film Cooling Towers

Greg M. Kelly, The Marley Cooling Tower Company

ENVIRONMENTAL IMPACT

TP12-26 .......... How “Green” is the Cooling Systems ......................................................................................................2012
Roy Holliday, Gary E. Geiger, Peter Geuns, GE Water & Process Technologies

TP10-13 .......... Design Considerations for Cooling Tower Systems with Critical Demands .................................................2010
Frank Bowman and Mike Bickerstaff, Composite Cooling Solutions, L.P.

TP10-09 .......... Plume Abatement – The Next Generation ..................................................................................................2010
Paul Lindahl and Ken Mortensen, SPX Cooling Technologies

TP09-03 .......... Hurricane and Crawfish - A Unique Clarification Problem ..........................................................................2009
Mike Dorsey, DuPont

TP05-05 .......... Atmospheric Emissions from Evaporative Cooling Towers .........................................................................2005
Wayne Micheletti, Wayne C. Micheletti, Inc.

Brian Lee and Brian Vaska, Drew Industrial Division

TP92-02 .......... The Latest Worldwide Technology in Environmentally Designed Cooling Towers ........................................1992
Gary R. Mirsky, Jean-Pierre Libert, and Kathy Bryant, Hamon Cooling Towers; Franz Bouton, Hamon Sobelco, S.A.

TP91-12 .......... Comparison of Cooling Tower Mineral Mass Emissions by Isokinetic EPA Method 13A and Heated Cascade Impactor Tests
Gordon Israelson, P.E., Westinghouse Electric Corp; Nicholas M. Stich and
ENVIRONMENTAL IMPORTANCE

TP11-02 ........ The 3 R’s of Sustainable Water Cooled Systems Operation ................................................................. 2011
   Allen Wilson, Fluid Treatment Solutions, Inc.

TP07-20 ........ Sea Water Cooling System Design ........................................................................................................ 2007
   Naresh Shah, Ph.D., Worley Parsons

FANS & ASSOCIATED EQUIPMENT

TP13-23 ........ Direct Drive Motor Design – Improving Product Availability by Rationalizing Design Considerations
   Robbie McElveen and Bill Martin, Baldor Electric Company ................................................................. 2013

TP13-17 ........ Low-Speed Motor Experience ............................................................................................................ 2013
   Mark Huber and Jean-Pierre Libert, Evapco, Inc.

TP12-17 ........ Permanent Magnet Direct Drive Motors: Lessons Learned ............................................................. 2012
   Robbie McElveen, Bill Martin, Baldor Electric Company

TP11-28 ........ Electric Motors 101: What You Need To Know ................................................................................. 2011
   Bill Martin and Robbie McElveen, Baldor Electric Company

TP11-23 ........ Retrofit of Cooling Fans in Hybrid Cooling Towers with Energy Savings, Airflow & Vibration Improvement
   Regina Wong Chin Pau, Genting Sanyen Power and Jos Oude Luttikhuis, Howden Cooling Fan

TP11-01 ........ Effect of Air Flow on Size and Weight of Direct Drive Permanent Magnet Motors ............................ 2011
   Robbie McElveen and Bill Martin, Baldor Electric Company

TP09-21 ........ Safely Stopping, Holding and Locking Out Cooling Tower Mechanical Sets ..................................... 2009
   Duane Byerly, Rexnord Industries

TP09-18 ........ Recent Development in Motor Technology Allow Direct Drive of Low Speed Cooling Tower Fans... 2009
   Robbie McElveen and Bill Martin, Baldor Electric

TP08-16 ........ The Cost of Noise ............................................................................................................................. 2008
   Robert Giammaruti, Hudson Products; Jess Seawell, Composite Cooling Solutions, LP

TP08-14 ........ Fan Stall Problems; Cause or Effect .................................................................................................. 2008
   Charles Foster, Diagnostic Cooling Solutions, Inc.

TP08-06 ........ Investigation on Fan Noise Generation and Its Reduction ................................................................. 2008
   Claudio Cataldo, Cofimco Srl

TP05-07 ........ Fan Air Flow Testing on Cooling Towers and ACHES ....................................................................... 2005
   Robert Giammaruti, Hudson Products Corporation

TP05-06 ........ Pressure Recovery Effects in Air-Cooled Installations ........................................................................ 2005
   Henk Van Der Spek, Howden Fans

TP04-04 ........ New Fan Blade Tip Design Reduces Structural Vibrations - Verification in Practice ......................... 2004
   Sander C. Venema, Howden Cooling Fans; Chris B. Lazenby, Southern Company Services

TP03-11 ........ Motor Efficiency - A Guide for Reduced Consumption ................................................................. 2003
   John Malinowski, Baldor Electric Company

TP03-05 ........ Vibration Control: New Fan Blade Tip Reduces Pulsation ................................................................. 2003
   Henk van der Spek, Howden Cooling Fans

TP02-12 ........ A Flexible Blade-To-Hub Connecting System Opposed To A Rigid Element ................................... 2002
   Riccardo Provasi, Cofimco, S.p.A. In An Axial Fan

TP01-05 ........ Cooling Tower #4, Fan Failure ........................................................................................................... 2001
   Dennis P. Shea and Shelby Sustala, Solutia, Inc.

TP00-05 ........ Evaluation of the Unsteady Loads on a Fan Blade .............................................................................. 2000
   Giorgio Cipelletti, Cofimco S.P.A.

TP99-11 ........ Advanced Airfoils for Cooling Tower Fan Blades .............................................................................. 1999
   James Tangler and Cris Bosetti, National Renewable Energy Lab; Dan Somers, Airfoils Inc.

TP99-06 ........ Structural Design Evolution of a Large Fiberglass Fan Blade ............................................................ 1999
   Larry Burdick, The Marley Cooling Tower Company

TP98-01 ........ Noise Testing of Cooling Tower Fan Drives ........................................................................................ 1998
   Craig Burriss, Amarillo Gear Company
TP97-12 .......... Maximizing Fan Performance .......................................................... 1997
  Robert C. Monroe, Hudson Products Corporation

  Larry F. Burdick, The Marley Cooling Tower Company

TP93-03 .......... Reduction of Noise Generation by Cooling Fans ........................................... 1993
  Ir. Henk F. van der Spek, Ventilatoren Strocco Howden B.V.

TP88-14 .......... Hydraulic Cooling Tower Driver the Innovation............................................. 1988
  John A. Dickerson, Hem, Inc.

  Charles Chittom, Chittom International

TP87-12 .......... Anomalies in Fan Efficiency Calculations ..................................................... 1987
  Weyert E. De Boer, Ventilatoren Stork Hengelo

Driveshafts:
TP13-26 .......... Accurately Determining Drive Shaft Natural Frequencies .............................. 2013
  Duane Byerly, Rexnord Corporation

TP05-04 .......... Natural Frequency Characteristics of Drive Shafts ......................................... 2005
  Robert Poling, Amarillo Gear Co.

TP97-10 .......... Mechanical Damage Caused by EMF Generated From Fast Bus Reclosure ....... 1997
  James T. Heard, Addax, Inc.

TP91-11 .......... Composite Couplings for Cooling Towers ..................................................... 1991
  Dennis Van Laarhoven, Consultant

Vibration:
  David A. Corelli, IMI Sensors

TP08-08 .......... Wireless Vibration Monitoring for Condition Based Maintenance Cooling Towers ........................................... 2008
  Gerry Nadley, MachineTalker, Inc.

TP07-14 .......... Smart Vibration Switches ............................................................................. 2007
  George Zusman, Ph.D., PCB Piezotronics

  Gene Ort

TP04-04 .......... New Fan Blade Tip Design Reduces Structural Vibrations - Verification in Practice ........................................... 2004
  Sander C. Venema, Howden Cooling Fans; Chris B. Lazenby, Southern Company Services

TP03-12 .......... Cost Effective Cooling Tower Fan Vibration Monitoring ................................ 2003
  Talmadge D. Ward Jr., and Mickey Talley, USEC Paducah Kentucky

  Henk van der Spek, Howden Cooling Fans

FAN PERFORMANCE
TP12-25 .......... Wind Effects on the Structural Integrity of Large Diameter Axial Fans in Air Cooled Condensers .... 2012
  Paul J.M. Nelissen, Howden Cooling Fans

FILLS
  Helene Troncin, EDF Septen

TP12-23 .......... Film Fill Fouling: Updated Methods, Results and Predictions .......................... 2012
  Kenneth Mortensen, SPX Cooling Technologies

TP09-14 .......... Flame Retardance of Polymer Film Fills ........................................................ 2009
  Dr. Nina Woicke, GEA 2H Kunststoff GmbH

TP09-10 .......... A Novel Approach to Design Compact Mass Transfer Packing for Maximum Efficiency .............................. 2009
  Dr. Hamid Reza Goshayshi, Azad University

TP07-02 .......... Design and Operation of a Counterflow Fill and Nozzle Test Cell: Challenges and Solutions ........ 2007
Jean-Pierre Libert, EvapTech, Inc.

TP06-21 .......... A Performance Comparison of Counterflow Reduced Fouling Fills ...................................................... 2006

TP06-20 .......... High Performance Ceramic Fill .............................................................................................................. 2006
Peter Fay, Consultant; Ann Engh, Sandkuhl Clay Works, Inc.

TP06-19 .......... Guidelines for Selecting The Proper Film Fill ........................................................................................ 2006
Donald Zelek, Brentwood Industries, Inc.

TP01-03 .......... Recycling Contaminated and Fouled PVC Fill ....................................................................................... 2001
Michel Monjoie and Serge Bigier, Hamon Thermal Europe

TP01-02 .......... Low Clog Film Fill - New Approaches .................................................................................................. 2001

TP00-01 .......... Design Features and Their Affect on High Performance Fill ................................................................. 2000
Rich Aull and Tim Krell, Brentwood Industries, Inc.

TP99-05 .......... A Comparison of Crossflow Cooling Tower Splash-Type Fills ............................................................. 1999
Robert D. Fulkerson, Fulkerson Enterprises, Inc.

TP99-03 .......... Fil Fouling Control in Cooling Towers ................................................................................................ 1998
F. Philip Yu, Anthony W. Dallmier and William F. McCoy, Nalco Chemical Company

TP95-07 .......... Innovative Application of Film Fill in Large Industrial Crossflow Cooling Towers ................. 1995
David Suptic, The Marley Cooling Tower Company

TP93-08 .......... Influence of Fill Type and Flow Orientation on the Lewis Number ...................................................... 1993
Dudley J. Benton, TVA Engineering Laboratory

TP93-06 .......... Research of Fouling Film Fill.................................................................................................................. 1993
Michel Monjoie, Hamon-Sobelco, S.A., Russell Noble, Southern Company Services; Gary R. Mirsky, Hamon Cooling Tower

TP92-09 .......... Cleaning and Maintenance of Film Fill at Florida Power Corporation .............................................. 1992
David Pearson and Jim Witherow, Florida Power Corporation; Barbara McClung, Calgon Corporation

TP92-06 .......... Cooling Tower Film Fill Water Quality/Operations Guidelines For Successful Utilization ............. 1992

TP91-03 .......... Evaluation of Plastic Fill For High Temperature Service ................................................................. 1991
Steven C. Blue, Paducah Gaseous Diffusion Plant; Martin Marietta, Energy Systems, Inc.

TP90-11 .......... Film Fill Recent Research and Application Data ..................................................................................... 1990
Gary R. Mirsky, Hamon Cooling Towers and Michel Monjoie, Hamon-Sobelco, S.A.

TP90-07 .......... Determination of the Turbulent Lewis Number From Experimental Data for Wet Cooling Tower Fill 1990
Dudley J. Benton, Tennessee Valley Authority

TP88-09 .......... The Usage of Fiber Cement as a Film Type Fill Media in Evaporative Cooling Towers ...................... 1988
John W. Cooper, Jr., Heinz Treuberg and Dr. Heiko Klaus, Toschi USA, Inc.

TP88-05 .......... Comparative Evaluation of Counterflow Cooling Tower Fills ............................................................ 1988
Robert D. Fulkerson, Cooling Tower Technology

FIRE PROTECTION

TP13-01 .......... Fire Protection in FRP Cooling Towers ................................................................................................. 2013
James L. Baker, Composite Cooling Solutions, LP

TP10-21 .......... Fire Resistant Wall Systems for Water Cooling Tower Systems ......................................................... 2010
Mike Bickerstaff, Composite Cooling Solutions, LP.

FOULING

TP07-17 .......... Anionic Compatible Quat? ...................................................................................................................... 2007
Philip Sweeney and Doug Murray, Lonza, Inc.

TP02-06 .......... Designed To Fail (Heat Exchanger Designs That Lead To Failure) ..................................................... 2002
T.J. Tvedt, Puckorius & Associates, Inc

TP02-04 .......... Anatomy of Enhanced Heat Exchanger Tubing .................................................................................. 2002
Thomas M. Laronge, Thomas M. Laronge, Inc; Mark A. Lisin, Lisin Metallurgical Services
High Efficiency 0.5 Micron Sand Filtration
Bryan Hayward, Chemworks Filtration Inc.

An Innovative Biodetergent for Fouling Control
F. Philip Yu, Nalco Chemical Company; Yu-May Lu, Taiwan Nalco Chemical Company, Ltd.

Film Fill Fouling in Counterflow Cooling Towers: Experimental & Field

Optical Monitor for Improved Fouling Control in Cooling Systems
R.L. Wetegrove, R.H. Banks and M.R. Hermiller, Nalco Chemical Company

Fouling of Film Forming Cooling Tower Fills - A Mechanistic Approach
J.S. Gill, M.A. Yorke, R.M. Donlan and D.L. Gibbon, Calgon Corporation

Film Fill Fouling in Counterflow Cooling Towers: Mechanism and Design
Kenneth P. Mortensen and Stephen N. Conley, The Marley Cooling Tower Company

New Application Technology For Controlling Algal Fouling in Recirculating Cooling Water Systems
A.L. Smith, R.A. Muia & M.O. Clancy, Calgon Corporation

Evolution of the Water Cooling Tower
James L. Willa, Willa, Inc.

The Cooling Tower Institute Origin - Evolution - Future (TP-35A)
C.D. Carlson, The Dow Chemical Company

Optimization of Water Cooled Chiller-Cooling Tower Combinations
James W. Furlong and Frank T. Morrison, Baltimore Aircoil Company

The Determination of the Effectiveness of the Coolpuck in the Mitigation of Biofilms in
HVAC-Utilities
Shawn H. Glinter and Jan De Rijk, Aquafinesse Industrial Water

Iron Rot - The "New" Nemesis
James L. Willa, Willa, Inc.

Chemical Free Bacteria & Legionella Control: A Case Study Using Hydrodynamic Cavitation
Phil Vella, Ph.D., VRTX Technologies

A New Method to Measure Viable Legionella and Total Heterotrophic Aerobic Bacteria
William F. McCoy, Phigenics LLC

One Company's Legionella Standard
J.W. Smith, Shell Global Solutions; Jerry Ransdell and Jim McLean, Shell Chemical Company

The Control of Bacteria On Surfaces: Effectiveness of Bromine-Based Biocides Towards Microbial...

Legionnaires’ Disease
William F. McCoy, Phigenics; Paul Lindahl, Jr., SPX Cooling Technologies

Biocide Treatments for Controlling Amoeba Amplified Legionella in Cooling Towers
Jana Rajan, Paul Schook, Dow Microbial Control

A Systematic Review of Biocides Used in Cooling Towers for the Prevention and Control of
Legionella spp. Contamination
Kelly Rangel, University of Texas

Iron Rot Attack

Legionella

Iron Rot - The "New" Nemesis

Legionnaires’ Disease

Chemical Free Bacteria & Legionella Control: A Case Study Using Hydrodynamic Cavitation

A New Method to Measure Viable Legionella and Total Heterotrophic Aerobic Bacteria

One Company's Legionella Standard

The Control of Bacteria On Surfaces: Effectiveness of Bromine-Based Biocides Towards Microbial...
LIGHTNING PROTECTION

TP05-09 .......... Lightning Protection for Cooling Towers ................................................................. 2005
James F. Blake, Jr., American Lightning Protection Systems, Inc.;
Bill Howard, American Cooling Tower, Inc.

MATERIALS

Ken Mortensen, and Robert W. Petterson, SPX Cooling Technologies

TP10-07 .......... New Cooling Tower Nozzle Features and Performance .................................................. 2010
Andreas Streng, Ph.D., CTS Cooling Tower Solutions GmbH

TP10-04 .......... Simultaneous Removal of Waterborne Bacteria and Total Suspended Solids Using an Antimicrobial .2010
Media in a Crossflow Filter System
James W. Stephens, Sonitec, Inc.; Mark B. Miller, A.S. Filtration, LLC

TP05-03 .......... The Impact of Veil Thickness and Coating Tower FRP Composites ...................................... 2005

TP02-17 Cooling Tower Systems Components and the Impact of Re-Use Water
2002

TP01-04 Water Reuse in Refineries, Chemical Plants, and Utilities: Experiences Throughout the USA – Guidelines and Case Histories
2001

TP95-15 Reclaimed Water as Cooling Tower Makeup for Refinery/Petrochemical Plants – Southern California's Activities and Time Table
Paul R. Puckorius, Puckorius & Associates, Inc.; Kris Helm, West Basin Municipal Water District; Chris Spurrell, Chevron U.S.A.
1995

TP95-11 Re-Use of Reclaimed Municipal Waste Water as Cooling Water Make-Up - Challenges and Solutions
Narasimha M. Rao, Nalco Chemical Company
1995

TP95-05 Water Conservation via New Cooling Water Technology
Nicholas J. Alfano, Calgon Corporation; Dennis J. Sherren, Enron Power Corporation
1995

TP94-09 Innovative Thinking in Water Conservation
Mikel E. Goldblatt, Betz Industrial
1994

TP94-08 Reuse of Industrial Waste Stream as Cooling Tower Makeup
Everett C. Phillips and Richard J. Strittmatter, Nalco Chemical Company
1994

TP94-08 Water Reuse Within a Refinery
K.S. Eble and J. Feathers, Betz Industrial
1993

TP12-11 Safe Cooling Tower Winter Operation
Michel Monjoie, Monjoie Cooling
2012

TP96-04 Cold Weather Operating Guidelines and Experience for Natural Draft Cooling Towers on the American Electric Power System
Frank L. Michell and Dan H. Drew, American Electric Power
1996

TP88-18 Anti-freezing System on Natural Draft Crossflow Cooling Towers - Cattenom Nuclear Plant
Jean Barbaud, Electricite de France
1988

TP84-09 Cold Weather Operation of Mechanical Draft Cooling Towers
N.E. Dolan, Ecodyne Cooling Products
1984

WOODB ORK ARCT

TP02-18 Evaluation of a Simplified Procedure to Determine the Condition of Wood Cooling Tower Components
Matthew E. Anderson, Wood Advisory Services, Inc.; Yelena S. Golod, DuPont Engineering
2002

TP98-12 Creosote Revisited
James L. Willa, Willa, Inc.
1998

TP96-01 Wood Preservation and How It Pertains to the Cooling Tower Industry
Darrell R. Smith, Conrad Wood Preserving Company; Jeffrey J. Morrell, Oregon State University
1996

ZERO DISCHARGE

TP93-05 Chemical Approaches to Zero Blowdown Operation
Gary E. Geiger and M.R.Hatch, Betz Industrial; J. Ogg, Stanford Linear Accelerator
1993
