

For Immediate Release

CTI Encourages Comments on Fan and Blower Efficiency Standards Rulemaking

HOUSTON, TX – February 25, 2013 The Cooling Technology Institute (CTI) would like to inform its members along with all other interested parties located in, or selling product within, the United States that the U.S. Department of Energy (DOE) will conduct an analysis of the energy use, emissions, costs, and benefits associated with commercial and industrial fans and blowers during the energy conservation standards rulemaking process currently underway. The DOE's framework document 78 FR 7306 can be viewed at the following link:

<http://www.regulations.gov/#!documentDetail;D=EERE-2013-BT-STD-0006-0002>

As fans either manufactured or used by CTI members may be affected by the current broad scope of this rulemaking, the CTI requests that you review this document and if appropriate, provide comments from you individually and email them directly to CIFB2013STD0006@ee.doe.gov. Please make sure to include Docket Number EERE-2013-BT-STD-0006 in the subject line of the message. All comments should clearly identify the name and address of the commenter. Please submit your comments on-line to the DOE by the May 2, 2013 deadline.

For further information on the CTI in general, including how to become a member, please visit www.CTI.org or contact Vicky Manser, the CTI Administrator, at vmanser@cti.org or (281) 583-4087.

About the Cooling Technology Institute

The Cooling Technology Institute (www.CTI.org), based in Houston, Texas, is an independent, not-for-profit organization dedicated to advocating and promoting the use of environmentally responsible Evaporative Heat Transfer Systems for the benefit of the public. The CTI encourages the wise use of the earth's water resources through education, research, standards development and verification, interaction with government agencies, and technical information exchange. The CTI has a broad based, global membership of individuals and organizations interested in Evaporative Heat Transfer Systems, including owner/operators, manufacturers, and suppliers.
