Bibliography of Technical Papers

Categorized for Technical Content
(May be subject to multiple interest)
Cooling Technology Institute
Bibliography of Technical Papers

The following papers have been presented at conferences of the Cooling Tower Institute and are listed by categories. Efforts are being made to simplify our filing system. The new order number is in the first column with the old order number in parenthesis after the title. This will help in cross referencing numbers. Reproduced copies of these papers are available from the CTI office, PO Box 681807, Houston, TX 77268. Please order by the new order number. Papers are priced at $10/each, plus processing fee. Prepayment is requested on all orders $25 or less. Due to the total number of papers in CTI’s possession any paper written before 1990 (with exceptions) is considered “Historical” and not listed in this printed document. A complete listing can be found on our website – www.cti.org.

ANALYSIS METHOD

David Correlli, IMI Sensors / Vibration Institute

TP10-19 .......... A Systematic Approach to Performing, Documenting and Reporting Inspections of Field Erected Cooling Towers
Casey Yurkovitch, GEA Power Cooling, Inc.; Philip Poll, OBR Cooling Towers, Inc.

TP10-14 .......... Automated Feed of Patented Aseptrol CW Oxidizing Biocide Provides “Best Practice” in Delivery of Chlorine Dioxide to Small-Scale Systems
Keith Hirsch, BASF Corporation; John Byrne, Richard McCaffrey, BASF Catalysts, LLC

TP10-05 .......... Complex Structural Analysis Simplifies Repair Phasing in Restoration of Hyperbolic Cooling Towers

TP10-01 .......... Your Cooling Tower Project On Time, On Budget
David Suptic, David M. Suptic, P.E. LLC

CLEANING SYSTEMS

TP18-12 .......... Underwater Robotic Technology for Online Tower Basin Cleaning
Randi Lee Morgan and Joe Leist, Scantron Robotics USA, Inc.

TP16-07 .......... Online Robotic Cleaning Method
Michael Dorsey, Aquacorr Services and Joe Leist, Scantron Robotics

TP10-08 .......... Cooling Tower Water Conservation
Jon J. Cohen and Henry A. Becker, H-O-H Water Technology

TP99-15 .......... Online Cooling Tower Cleaning and Water Division
Cliff Roy and John Foy, Syncrude Canada LTD; Lloyd Olson, International Cooling Towers

TP98-13 .......... New Technology Improves Tower Basin Cleaning
Randy Deletnikos and Bill Leizear, LAKOS Filtration System

TP96-02 .......... Online Cooling Tower Cleaning
Mark Coyle and Gordon Barksdale, American Inland Divers, Inc.

CONVERSION

TP99-14 .......... Conversion of a Crossflow Tower to a Double-Level, Multi Fan Counter Flow Tower
Vincent Wiltz, Cooling Tower Specialist

TP97-02 .......... Com Ed Co. Byron Generating Station Unit 1 Crossflow to Counterflow Conversion
James O. Smith, Com Ed Co.; Mark Muder, Marley Cooling Tower

COOLING TOWER WATER BLOWDOWN TREATMENT

TP07-07 .......... Zero Blowdown for Cooling Towers
Sam Owens, Chemico International, Inc.

TP06-14 .......... Copper Removal From Cooling Tower Blowdowns
Christopher Howell and David Christophersen, Crown Solutions, Inc.

TP06-02 .......... Cooling Tower Blowdown Limitations: Case Studies of New Wastewater Permit Limits
Jennifer Cunningham, Air Liquide Large Industries US LP
COOLING TOWER WATER TREATMENT PROGRAMS

TP16-26 .......... Cooling Water Scale and Corrosion Monitoring ................................................................. 2016
L.J. Aspinall, Aquatech International and Brian Bloxam, CF Industries

TP15-22 .......... Controlled Hydrodynamic Cavitation for Cooling Tower Water Treatment ........................................... 2015
David Burge, Ecowater CHC

Of an Electrodynamic Pulse Field Water Treatment
Paul R. Puckorius, Puckorius & Associates; Richard Ruckstuhl, Jr., CWT Waterhouse Corporation

TP14-25 .......... Noise Control of Water Cooling Towers in Rome’s Hospital Area ...................................................... 2014
Augusto Papa, PhD, Italian Workers Compensation Authority

TP14-22 .......... pH Impact on Inhibitor Performance .............................................................................................. 2014
Robert J. Ferguson, French Creek Software, Inc.

TP14-14 .......... Development and application of Phosphorus Free Cooling Water Technology ........................................... 2014
Raymond M. Post, P.E. and Richard Tribble, ChemTreat, Inc.

TP14-10 .......... Efficient Polymer Use in Cooling Tower Makeup Water Treatment at Coal-Fired Power Plant .......... 2014
Etienne Prehoda and Yong Kim, Prominent Fluid Controls; Emily Vsetecka Sunflower Electric Power Corporation

Trey Cook, Michael Dorsey and Matt Walker, DuPont

TP14-06 .......... Cooling Water Microbial Control Impacts Overall Plant Performance .................................................. 2014
Kevin Boudreaux and Aaron Haines, Nalco Company

TP13-20 .......... Condenser Performance Monitoring .............................................................................................. 2013
Daniel M. Cicero, Nalco Company

TP13-02 .......... Should I Use a Chemical Treatment Program for My Tower or a Physical Device? ............... 2013
Robert J. Cunningham, Arthur Freedman Associates

TP12-20 .......... Going It Alone: Lessons Learned From Managing Our Own Water Treatment Program ............... 2012
John Young, P.E., Cree, Inc.

TP12-18 .......... Polymer Detection in High Halogen Power Plant Cooling System Application .............................. 2012
John P. Pilsits, Barbara E. Moriarty, Ph.D., Daniel M. Cicero, Nalco Company
Real-Time Biological Monitoring

Ken Davenport, Biotrace, Inc.

A Non-Chemical Water Treatment Device

John Lane, Clearwater Systems; Gerald Kutner, Engelhard

Tweaking-The Art and Science of Successful Cooling Water Treatment

Actives Based Monitoring and Control for Improved Cooling System Management and Performance

Michael G. Trulear and John Richardson, ChemTreat, Inc.

Halogen Stable Alkaline Cooling Program

Dave Ritz and Gary Geiger, BetzDearborn Inc.

Making the Best Choices in Water Treatment Additives

Roy Manley, BetzDearborn, Inc.

Maximizing Cooling Tower Cycles of Concentration

Robert J. Cunningham, Chemisis Inc.

A Mechanistic Study of Corrosion Inhibition by Phosphonates

B.J. Hepburn and P.J. Sullivan, FMC Corporation

Monitoring Biological Control in Cooling Systems

Gary G. Engstrom and Jack C. Tully, Grace Dearborn

Development of High Cycle Cooling Water Treatment Program

Binu S. Khambatta, Daniel A. Meier and Michael A. Kamrath, Nalco Chemical Company

Alkaline Phosphate - A New Direction for Phosphate Cooling Water Treatment

Christine M. Stuart and Phil Eastin, Nalco Chemical Company

Laboratory Development of Novel Multifunctional Polymers for Cooling for Water Use

Ingrid Brase and Joseph Pasapane, National Starch and Chemical Co.; James H. Belcher, Alco Chemical Company

Novel Galvanized Cooling Tower Corrosion Inhibitor

Mary Jane Felipe and Sidney Dunn, Baker Hughes Inc.

New Yellow Metal Corrosion Inhibitor with Better Performance, Improved Stability, and Lower Toxicity

Andrew Yanjiao Xie and Daniel Meier, Nalco Water, An Ecolab Company

Importance of Corrosion Monitoring in Cooling Water Systems

Michael Dorsey, AquaCorr Services

A Fresh Perspective on Controlling Yellow Metal Corrosion

Jon Cohen, ChemTreat, Inc.

Simplifying Corrosion Control With A Safer Choice Inhibitor

Eric C. Ward, Emily M. Crane, and Gregory J. Koniges, Rivertop Renewables

Modeling Lead and Copper Corrosion and Solubility

Robert J. Ferguson, French Creek Software, Inc.

Can Rusted Surfaces Be Effectively Passivated To Reduce Further Corrosion

Prasad Kalakodimi, Ph.D., Richard H. Tribble, Raymond M. Post, P.E., ChemTreat, Inc.

Novel and Efficient Non-Phosphorous Cooling Water Corrosion Inhibitor

Mary Jane Felipe, David Fulmer, Corina Sandu, Bing Bing Guo, and Khac Nguyen, Baker Hughes

Improve System Performance and Reduce System Corrosivity Using A Novel Biocide for Cooling Towers

Chris Baron and Stephanie Hammond, PhD, Solenis

A Review of Solid-Form Scale and Corrosion Inhibitors

Michael Hunter, APTech Group, Inc.

Premature Failure of Open and Closed Recirculating Cooling Water and Fire Water System

Restoration of Concrete Cooling Towers Damaged by Reinforcing Steel Corrosion

A Synergistic Combination of Advanced Separation and Chemical Scale Inhibitor Technologies

Jasbir S. Gill, Ph.D., Nalco Company; Yupo J. Lin, Ph.D, Argonne National Laboratory
TP13-07 .......... Microbial Corrosion on Metallic Surfaces.............................................................................................. 2013
  Karoline Bohlen, Colorado School of Mines

TP11-12 .......... The Progression of Automation and Process Control for the Management of Open .............................. 2011
  Cooling Water Systems
  Kevin Milici and Gary E. Geiger, GE Water & Process Technologies

TP10-17 .......... Corrosion Protection of Concrete for Cooling Towers........................................................................... 2010
  Javier Balma, Ph.D., P.E. and Dilip Choudhuri, P.E.

TP10-12 .......... Copper Corrosion Control and Minimized Copper Discharge from Cooling Tower .......................... 2010
  Jasbir S. Gill, Ph.D. and Ed Grodecki, Nalco Company

TP07-23 ........... A New Closed System Treatment Program for Industrial Applications................................................. 2007
  William Beer and Rosa Crovetto, GE Water and Process Technologies

TP07-21 ........... New Liquid Biocide Products for Specific Industrial Water Treatment Requirements.......................... 2007
  Christopher J. Nalepa, Farrah Azarnia and Tina Craft, Albemarle Corporation

TP07-08 .......... Corrosion-Induced Concrete Deterioration and Rehabilitation of Natural Draft Hyperbolic ................. 2007
  Cooling Towers
  Leandro Etcheverry, Structural Preservation System

TP07-03 .......... Cooling Water - Optimal Control of Admiralty Corrosion Utilizing Multiple Halogen Sources........... 2007
  Gene Dombrowski, Chemtreat, Inc.; John Zimowski, DuPont

TP06-06 .......... Improving Localized Corrosion in a Complex Cooling Water System .................................................. 2006
  Michael H. Dorsey and Arthur F. Brunn, DuPont; Kevin Daigle, ChemTreat, Inc.

TP02-15 .......... Corrosion and Biofouling Control in a Refinery Cooling Water System Using Sewage Water............ 2002
  as a Make Up
  Abdulmohsen Almajnouni, Saudi Arabian Oil Company; Arif Jaffer, Baker Petrolite

TP97-14 .......... Elucidation of Components of Aromatic Triazole Demand in Cooling Water Systems and............... 1997
  Development of More Environmentally Friendly Yellow Metal Corrosion Inhibitor
  Narasimha M. Rao, Donald A. Johnson, and Frank F. Lu, Nalco Chemical Company;
  N.P. Nghiem, Oakridge National Laboratory

TP96-14 .......... Corrosion Inhibition of Ferrous Metal in Soft Water Under Cooling Water Conditions............................ 1996
  Colin Hogan, FMC Process Additives Division

TP96-12 .......... Analyzing Corrosion Rates of Copper for Open Re-circulating Systems ............................................... 1996
  Gary Caplan, Diversey Water Technologies Ltd.

TP96-10 .......... Cathodic Protection of the Palo Verde Cooling Towers......................................................................... 1996
  William R. Schutt, Matcor, Inc.

TP94-13 .......... The Control of Ferrous Metal Corrosion in Cooling Water by a Novel Phosphonate Corrosion .......... 1994
  Inhibitor
  David A. Little, Wayne A. Mitchell and E.S. Lawson, Grace Dearborn

TP94-10 .......... Pitting Corrosion of Cooling Water Systems.......................................................................................... 1994
  Mark A. Lisin, P.E. and Thomas M. Laronge, Thomas M. Laronge, Inc.

TP91-14 .......... Update on White Rust Corrosion and Control.......................................................................................... 1991
  Keith M. Johnson and Joseph B. Mihelic, Drew Industrial Division

TP90-08 .......... An Alternative Oxidizer, Bromine Offers a Northeast Chemical Plant Improved Corrosion ................. 1990
  and Fouling Control
  Mark J. Giusto, Drew Industrial Division

TP89-11 .......... Investigation of Alternative Inhibitor Programs for Highly Corrosive Alkaline Waters......................... 1989
  Greg Simpson and Richard Murtagh, Burmah Technical Services, Inc.

TP89-01 .......... Reducing Copper Corrosion and Discharge via a Novel Inhibitor and Applications Program................. 1989
  Orin Hollander and Charles Shelton, Betz Industrial; Ronald Griffin, City of Tallahassee Electric Dept.

TP87-14 .......... Corrosive Water - A Brazilian Reality ................................................................................................... 1987
  Jose Otavio Silva, Messias Candido Amaral and Flavio Bianchi, Aquatec Quimica, S.A.

DRIFT

TP17-11 .......... New Laboratory of the Cooling Tower Research in the Czech Republic.................................................... 2017
  Pavol Vitkovic, Czech Technical University in Prague
TP12-09 .......... Alternate Chemical Analysis for Drift Losses Measurements ................................................................. 2012
Michel Monjoie, Monjoie Cooling; Eugene Culver, McHale & Associates, Inc.

Vincent Ganzitti, Hamon

TP12-21 .......... Best Practicies for Minimizing Drift Loss in a Cooling Tower .......................................................... 2012
William C. Miller, Brentwood Industries, Inc.

Jan Cizek and Ludmila Novakova, CTU In Prague

Dudley Benton, McHale & Associates

TP09-16 .......... Meteorological Considerations in the Design of Plume Abated Cooling Towers .............................. 2009
Kenneth W. Hennon and David Wheeler, CleanAir Engineering

William C. Miller, Timothy E. Krell, Brentwood Industries, Inc.

TP05-12 .......... An Economical Solution to Cooling Tower Drift .................................................................................. 2005
G.C. Pederson, Frank Power and Arthur Braren, KIMRE, Inc

TP03-08 .......... Cooling Tower Emissions Quantification Using The Cooling Technology Institute Test Code ............ 2003
ATC-140
Kenneth W. Hennon and David Wheeler, Power Generation Technologies

TP99-13 .......... A Non-Metallic Air Cooled Heat Exchanger for Cooling Tower Plume Reduction .............................. 1999
David M. Suptic, The Marley Cooling Tower Company

TP98-16 .......... The Relationship Between SP and HGBIK Drift Measurement Results - New Data Creates a Need.... 1998
for a Second Look

TP98-08 .......... Cooling Tower Plume Abatement at Chicago's O'Hare Airport ............................................................. 1998
J.D. (Doug) Randall, P.E., The Marley Cooling Tower; Michael C. Long, P.E., Black & Veatch; Romesh K. Kansal, P.E., Dept of Aviation, City of Chicago

TP96-05 .......... Prediction of the Plume From a Cooling Tower ...................................................................................... 1996
Kazutaka Takata, Kiyoshi Nasu, and Hiroyuki Yoshikawa, Shinko Pantec Co., Ltd.

TP94-16 .......... Drift Eliminators and Fan System Performance ..................................................................................... 1994
Dr. Bryan R. Becker, P.E., Assoc. Professor of Mechanical Engr., Univ. of Missouri; Larry F. Burdick, P.E. Project Engineer, The Marley Cooling Tower Company

TP94-01 .......... Drift Testing - Scale Up From Test Cell To Field Acceptance Test ....................................................... 1994
David Brill, Black & Veatch; Joe H. Lander, Florida Power Corp.

TP93-07 .......... Simultaneous Comparison of the CTI HBIK and the EPA Method 13A Isokinetic Drift Test .............. 1993
Procedures
Michael R. Whittemore, Brentwood Industries, Inc.; Thomas E. Weast, Midwest Research Institute

TP93-01 .......... Plume Abatement and Water Conservation With The Wet/Dry Cooling Tower .................................... 1993
Paul A. Lindahl, & Randall W. Jameson, The Marley Cooling Tower Company

TP92-10 .......... Reduction of Cooling Tower PM10 Emissions Due to Drift Eliminator Modifications at a .................. 1992
Chemical Refining Plant
Thomas E. Weast, P.E. and Nicholas M. Stich, Midwest Research Institute; Gordon Israelson, P.E., Westinghouse Electric Corporation

TP90-12 .......... Comparison of Two Isokinetic Drift Measurement Methods ................................................................. 1990
Paul Lindahl and O.L. Kinney, The Marley Cooling Tower Company

TP87-08 .......... An Economical Solution to Cooling Tower Drift .................................................................................. 1987
George C. Pedersen, P.E., KIMre, Inc.; V. Keith Lamkin, P.E., Engineered Processes, Inc.; Mike Seich, The Dow Chemical Company

TP86-01 .......... Comprehensive Drift Measurements on a Circular Mechanical Draft Cooling Tower .................... 1986
Karl Wilber, Environmental Systems Corp; Ken Vercauteran, Arizona Public Service

**DRY COOLING**

TP18-11 .......... Cost/Performance Tradeoffs Among Wet, Dry and Hybrid Cooling Systems ........................................ 2018
John S. Maulbetsch, Maulbetsch Consulting and Michael N. Difilippo, Difilippo Consulting
TP16-27 Use of Large Diameter Fans on Air Cooled Heat Exchangers

TP16-25 Wind Effects on Air-Cooled Condensers: Insights from the Wind-Tunnel
Ryan Parker and Bruce R. White, University of California Davis

TP15-26 Hybrid Cooling Towers – Water Savings Calculations and Measurements
Jean-Pierre Libert, Evaptech, Inc.

TP15-07 Wind Barrier Effectiveness on Air Cooled Condensers
John S. Maulbetsch, Maulbetsch Consulting

TP15-01 Numerical Study on Erosion at the Tube Entry Region of an Air Cooled Condenser
Donghyouck Han, Department of Mechanical Engineering, Korea University

TP14-19 Advanced Cooling Solutions for Water Conservation
Jean-Pierre Libert and Tom Bugler, Evapco, Inc.

TP13-05 Air Cooled Steam Condenser Test Laboratory
Mark Huber and Jean-Pierre Libert, Evapco, Inc.

TP07-04 Effects of Wind on Air-Cooled Condenser Performance
John S. Maulbetsch, Maulbetsch Consulting; Mical N. Difilippo, Consultant

TP06-09 Enhancement of Air Cooled Condenser Operation in Power Plants
Ram Chandran, Holtec International

TP06-07 Evaporative Pre-Coolers for Air Cooled Heat Exchangers
Matt Smith, L.S. Enterprises; Rich Aull, Brentwood Industries; Robert Giammaruti, Hudson Products Corporation

TP05-06 Pressure Recovery Effects in Air-Cooled Installations
Henk Van Der Spek, Howden Cooling Fans

TP04-13 Performance Improvement to Existing Air-Cooled Heat Exchangers
Robert Giammaruti, Hudson Products Corporation

TP03-01 Why Every Air Cooled Steam Condenser Needs A Cooling Tower
Luc DeBucker, PhD and William M. Wurtz, Hamon Dry Cooling

TP98-15 The New Wet/Dry Cooling Tower Without Finned Tube Dry Section (NWD)
Toshio Miura and Osamu Gotoh, Ishikawajima Plant Engineering & Construction Co., Ltd.

ENERGY EVALUATION

In Fresh Air Pre-Cooling Applications in Hot and Humid Climatic Conditions
Moe Salem, Air2O Cooling LLC; Ayman Youssef, Saudi Aramco

TP14-01 Providing Water Resiliency for Power and Process Cooling Applications
Thomas P. Carter, P.E. and James W. Furlong, P.E., Johnson Controls, Inc.

TP10-16 Water/Energy Nexus, Comparing the Relative Value of Water Versus Energy Resources
Jennifer Hamilton, Tom Bugler and John Lane, Evapco, Inc.

TP10-15 Enhanced Cooling Tower for Colder Water, Energy Savings and Reduced Evaporation
Jarrell Wenger, Engineering Economics, Inc.

TP08-02 Evaluating Your Cooling Tower
Richard DesJardins, DesJardins Consulting

TP07-22 Variable Frequency Drives: Operation and Application with Evaporative
Benjamin Cohen, Baltimore Aircoil Company

TP01-07 Cooling Towers and VFD’s
Rick Foree, Danfoss Drives

TP00-12 Developing the Worth of Colder Water in a Steam Turbine Generating Station
Thomas H. Hamilton, P.E., Consulting Engineer

TP96-03 Variable Speed Fan Drives for Cooling Towers
William F. Immell, The Marley Cooling Tower Company

TP91-10 Strategies For Improved Cooling Tower Economy
Steve Adams, Ecodyne Cooling Tower Services; John Stevens, Film Cooling Towers

TP87-04 Counterflow Cooling Tower Design With High Energy Evaluations
Paul Lindahl, Jr. & Thomas Bugler, III, The Marley Cooling Tower Company

S.J. Colby, D.E. Emerich and M.C. Wangerin, Ashland Specialty Chemical Company

TP01-12 .......... Water Treatment Can be Bid Successfully ............................................................................................. 2001
Thomas M. Laronge and Roland A. Leathrum, Thomas M. Laronge, Inc.

TP01-11 .......... Removal of Copper During Start-Up of Cooling Tower ........................................................................ 2001
Karen F. Pedraza and Dennis P. Shea, Solutia, Inc.

TP01-09 .......... Extend the Life of Wetted Surfaces ........................................................................................................ 2001
Mark A. Lisin, Lisin Metallurgical Services; Thomas M. Laronge, Thomas M. Laronge, Inc.

TP01-06 .......... Mixed-Oxidant Use in Cooling Tower Maintenance .............................................................................. 2001
Wesley L. Bradford, Los Alamos Technical Assoc., Inc.; Paul Petersen, Trident Technologies, Inc.

TP00-14 .......... Recent Advances in High Alkaline Cooling Water Treatment ............................................................... 2000
John Richardson and Michael G. Trulear, ChemTreat, Inc.

TP00-04 .......... Bugs and Bugaboos of Cooling System Components ........................................................................ 2000
Thomas M. Laronge, Thomas M. Laronge, Inc.

William R. Leizear, Randall D. Delenikos, LAKOS Filtration Systems

TP97-11 .......... A New Treatment for Calcium Carbonate Control in Alkaline Conditions ............................................ 1997
Jasbir S. Gill, Jennifer R. Parson and Robert C. Gordon, Calgon Corporation

TP97-08 .......... Twenty Minutes with Molybdate ............................................................................................................ 1997
M.H.L. Garnaud, Climax Molybdenum UK, Ltd; Thomas J. Risdon, Climax Molybdenum Marketing Corporation

TP95-09 .......... Highly Effective New Polymer For Calcium Phosphate Control in Cooling Water Systems ............... 1995
Anne B. Austin and Michael L. Standish, Alco Chemical

TP95-04 .......... Fractures in Cooling Water System Components ................................................................................... 1995
Thomas M. Laronge & Mark A. Lisin, Thomas M. Laronge, Inc.

TP93-11 .......... Silica Stabilization in Industrial Cooling Towers: Recent Experiences and Advances .......................... 1993
Paul R. Young, Christine M. Stuart and Phillip M. Eastin, Nalco Chemical Company; Marshall McCormick, Chevron

TP93-10 .......... A New On-Line Monitoring and Control Capability for Cooling Water Programs ............................... 1993
J. Richardson, K.D. Heinz and M.A. Reinsalu, Grace Dearborn, W.R. Grace

TP93-04 .......... Fingerprints of Errors - Failures in Cooling Water Systems ................................................................. 1993
Arthur J. Freedman, Ph.D., Mark A. Lisin, P.E. and Thomas M. Laronge, Thomas M. Laronge, Inc.

TP93-02 .......... Control of Microbiological Contaminants in Small Cooling Systems ................................................... 1993
Daniel H. Pope, Ph.D., Bioindustrial Technologies, Inc.; William T. Osborne, Baltimore Aircoil Company
TP92-14 Evaluation of Alternatives to Gaseous Chlorine for Cooling Water
Marcus Vaska & Winston Go, Microbiological Control, Drew Industrial Division
1992

TP92-08 Automated Oxidant Control
Phil Kiser, Stranco, Inc.
1992

TP92-03 Practical Considerations in High Cycle Cooling Water Operations
Arthur J. Freedman and Thomas M. Laronge, Thomas M. Laronge, Inc.;
Chester M. Malewski and Craig W. Williams, Sierra Pacific Power Company
1992

TP91-08 Precise Prediction of Cooling Water pH
Craig W. Ballard and Jack V. Matson, Ph.D., P.E., University of Houston
1991

TP91-04 Fail-Safe Cooling Water Operations
1991

TP90-13 Effects of Molybdate in Cooling Water Treatment Programs
Kenneth P. Fivizzani and Sang-Hea Shim, Nalco Chemical Company
1990

TP90-10 Problems and Pitfalls in Water Treatment Specifications
1990

TP90-01 Practical Applications of Tracers - Beyond Product Monitoring
John E. Hoots, Nalco Chemical Company
1990

TREATMENT EVALUATION

TP18-30 A Robust Non-Phosphorous Corrosion and Scale Control Program for Cooling Systems
Bingzhi Chen, Nalco Water, An Ecolab Company
2018

TP17-24 How to Choose a Biocide Program for a Recirculation Cooling System
Christopher Baron, ChemTreat, Inc.
2017

TP16-16 The Evolution and Practical Application of Scale Inhibitor Modelling and Dosage Optimization
Robert J. Ferguson, French Creek software, Inc
2016

TP16-14 Controlled Hydrodynamic Cavitation: A Physical Water Softening and Disinfection Method
Joshua Beach-Letendre and Carl Steffen, Ecowater CHC
2016

TP15-20 Alternative to Bromine Improves Cooling Water Microbial Control and Overall Treatment
Andrew Boal, PhD, MIOX Corporation
2015

TP15-04 The Impact of Ionic Strength Upon Inhibitor Speciation and Efficacy
Robert J. Ferguson, French Creek Software, Inc.
2015

TP13-22 Application of Controlled Release Chemistry to Cooling Towers
Kevin Emery, ChemTreat, Inc. and Miles Stoffer, Dober
2013

TP13-18 Film Formation, Stability and Corrosion Inhibition of Surface Deposited Film Inhibitors
Jon J. Cohen and Sean Parmelee, H-O-H Water Technology
2013

TP13-10 Chemical Cleaning Techniques for Galvanized and Stainless Cooling Towers
Kevin Emery and Rob Bedniger, ChemTreat, Inc.
2013

TP13-06 Novel Biocide Delivery for Improved Control of Biofilm Organisms
Dorothy Reynolds, GE Water & Process Technologies
2013

TP12-10 Field Evaluation and Verification of Biological Control in Operating Cooling Tower Water
Paul Puckorius, Puckorius & Associates, Inc.
2012

TP11-14 Practical Evaluation of Treatment Chemicals for Scale Inhibition in Open Evaporative
Roy A. Holliday and Gary E. Geiger, GE Water & Process Technologies
2011

TP11-10 AWT’s ASHRAE Liaison Report: NCDs and Biological Control in Cooling Water Systems
Bill Pearson, Southeastern Laboratories, Inc.
2011

TP07-15 An Alternative Method for Delivering Cooling Water Treatment Chemicals Using Controlled
Release Technology
Dennis Kelly and Dan Dobrez, Dober Group
2007

TP07-09 Twenty-Years of Cooling Water Treatment Experience in Manhattan
Marcus N. Allhands and Carmine Puglisi, Orival, Inc.
2007

TP03-21 Condenser Water Treatment Using Pulsed-Power
John Lane, Clearwater Systems and David Peck, Eichleay Engineers & Constructors
2003
USE OF BIOCIDES

TP15-16 .......... An Alternative Approach to Disinfection Using Chlorine Dioxide ........................................................ 2015
    Ingmar Hermans and Vincent Van Camp, Twinoxide International B.V.

TP99-16 .......... Unique Biodispersant Removes Biofilms and Increases Biocides Efficacy ........................................... 1999
    Melvin H. Czechowski and Kurt W. Whitekettle, BetzDearborn Inc.

TP98-09 .......... A Comparison of Bromine-Based Biocides in a Medium-Size Cooling Tower ........................................ 1998
    Christopher J. Nalepa, Robert M. Moore, Albemarle Corporation

TP98-06 .......... A New Biocide for Control of Algal Biofouling in Cooling Towers ..................................................... 1998
    K. Mark Wiencek, Terry M. Williams and Robert F. Semet, Rohm And Haas Company

UTILITY INDUSTRY

TP11-18 .......... Assessment of Existing Galvanic Corrosion Protection Systems ........................................................... 2011
    Javier Balma and Dilip Choudhuri, Walter P Moore and Associates, Inc.

TP00-11 .......... Circular Hybrid Cooling Towers ............................................................................................................ 2000
    Andreas Streng, Ph.D., Balcke-Duerr Energietechnik GmbH

TP00-10 .......... With "New-Age Brands" Into a "Brand-New Age" ................................................................................ 2000
    Leo Vonk, Bis Both Industrial Services BV

TP90-03 .......... Operating Feedback of French Cooling Towers Civil Work and Equipment ......................................... 1990
    P. Coic, Electricite De France

WATER MANAGEMENT

TP16-10 .......... A CMIT/MIT Surfactant Blend to Control Biofilms to Industrial Water Systems ........................................ 2016
    Brian Corbin, Ph.D., The Dow Chemical Company

TP15-02 .......... Managing Reliability in Industrial Cooling Systems ............................................................................... 2015
    Kevin Emery and Joe Keating, ChemTreat, Inc.; Al Feltzin, Linde Gases

TP14-18 .......... A Detailed Independent Field Site Evaluation of Electrodynamic Field Generation Results .................. 2014
    As the Cooling Water Treatment
    Richard Ruckstuhl, Jr., Waterhouse Corporation

TP14-02 .......... Lessons Learned from a Hero-Based ZLD System ................................................................................ 2014
    Brad Buecker, Kiewit Power Engineers

TP11-24 .......... Potable Water Reduction Strategies ....................................................................................................... 2011
    Jon J. Cohen and Henry A. Becker, H-O-H Water Technology

TP08-17 .......... The Conversion From Gas to Tablet Chlorination: A Case Study................................................................. 2008
    Austin Looper, PPG Industries; Billy Smith, ChemTreat, Inc.

    Bernie Wieck, Universal Utility Services

TP05-18 .......... Low Cost Cooling Tower Biocide Alternative ............................................................................................ 2005
    David Evans and Nidhal Dossary, Saudi Aramco
TP03-20 ........ Power Plant Restores Cooling System Performance With Bio-Detergent Cleanup .......................... 2003
Charles W.H. Foster and Trevor Gent, ONDEO Nalco Canada Co.
TP03-14 ........ San Antonio Water System's Cooling Tower Audit Program Results in Significant Water Savings ..... 2003
TP03-04 ........ Automating the Cooling Water Triangle ................................................................. 2003
TP99-12 ........ Cooling Tower Water Conservation Using Solubility Chemistry .................................... 1999
Stephen E. Mitchell, S & S Consulting Services
TP99-09 ........ Get the Limits of Cooling Tower Design: Low Approach-Large Range-Cold Water 38°F .......... 1999
Michel Monjoie, Hamon Thermal; Rob Schwalm, Barrick Goldstrike
TP97-03 ........ An Effective Method for Non-Chemical Control of Microbial Activity in Cooling Towers .......... 1997
John Dresty, Environmental Research Institute; James Fitzpatrick, Warner Lambert Corp.
TP90-02 ........ Designing a Cooling Water Program With the Aid of a Three-Dimensional Cost Optimization..... 1990
Computer Method
Mei H. Hwang, Charles J. Mccleskey and John A. Hvizdos, Calgon Corporation
TP86-09 ........ Enhanced Water Management Using Bromine Chemistry .................................................... 1986
Rodney H. Sergent, Great Lakes Chemical Corporation
TP84-02 ........ The Importance of Water Management in Plant Design....................................................... 1984
Bruce M. Webber and Albert D. Owens, Calgon Corporation

WATER REUSE

TP18-04 ........ Investigation About Wastewater Profile to Reuse in Cooling Tower, an Operational .............. 2018
Risk Discussion
Salvador Avila Filho, Jean M.P. Silva, Jose R.N. Lopez, Marco A.B. Araujo and Maria B.M.M. Nobrega, Federal University of Bahia
TP16-02 ........ Increasingly Complex Cooling Tower Makeup Water Issues ................................................... 2016
Brad Buecker and Behrang (Ben) Pakzadeh, Ph.D., P.E., Kiewit Engineering and Design Co
TP15-14 ........ From vision to Practical and Cost Effective Design ......................................................... 2015
Roy A. Holliday, GE Water & Process Technologies, Europe; Shereif Alsayed, GE Water & Process Technologies, Middle East and Africa; Amr Eladawy, Abu Qir Fertilizers Co., Egypt
TP13-12 ........ Water Reuse – As Time Goes By D The Less Attractive Approaches or Options Now Look ........ 2013
More Attractive
Mark Huber and Jean-Pierre Libert, Evapco, Inc.
TP12-22 ........ A State-Of-The-Art Chemistry Based Toolset for Developing and Optimizing Power Plant Water..... 2012
Balance Models
Daniel J. Robinette, Rocky Mountain Water Engineering, LLC
TP09-09 ........ An Integrated Approach to Water Reuse ........................................................................ 2009
Pete Elliott and Gary Geiger, GE Water & Process Technologies
TP08-03 ........ Recycled Water for Cooling 4000°F Melted Sand ............................................................... 2008
Dr. Marcus N. Allhands and Tom Broderick, Orival, Inc.
TP08-01 ........ Water Reuse in Cooling Towers - Current Experiences and Guidelines for Success in Refineries,...... 2008
Power Plants, and HVAC Systems
Paul Puckorius, Puckorius & Associates, Inc.
TP07-19 ........ Efficient One Step Phosphorous & Suspended Solids Removal from Municipal Wastewater....... 2007
Ben Gould, Ashbrook Simon-Hartley; Clarence Melancon, Water Filtration Technologies, Inc
TP05-17 ........ Monitoring Cooling Water for Potential Reuse ................................................................. 2005
Phil Kiser, Hach Company
TP05-16 ........ Bacterial Resistance to Biocides in Recirculating Cooling Water Systems ............................. 2005
Dr. Chris L. Wiatr, Buckman Laboratories, Inc.
TP05-13 ........ Evaluation in to the Use of Mine Drainage to Supplement Cooling Water .............................. 2005
Dr. A. Harriram and D.G. Nieuwenhuis, Sasol Technology
TP04-01 ........ Denver's Cooling Tower Water Conservation Program ...................................................... 2004
Paul R. Puckorius and David A. Puckorius, Puckorius & Associates, Inc.; Jim Reed, Denver Water Board
TP03-03 ........ Water Reuse Experiences With Cooling Tower Systems in San Antonio, TX ........................... 2003
TP02-17 .......... Cooling Tower Systems Components and the Impact of Re-Use Water ................................................ 2002

TP01-04 .......... Water Reuse in Refineries, Chemical Plants, and Utilities: Experiences Throughout the USA – ........ 2001
  Guidelines and Case Histories

  California's Activities and Time Table
  Paul R. Puckorius, Puckorius & Associates, Inc.; Kris Helm, West Basin Municipal Water District;
  Chris Spurrell, Chevron U.S.A.

TP95-11 .......... Re-Use of Reclaimed Municipal Waste Water as Cooling Water Make-Up - Challenges and .......... 1995
  Solutions
  Narasimha M. Rao, Nalco Chemical Company

TP95-05 .......... Water Conservation via New Cooling Water Technology ............................................................... 1995
  Nicholas J. Alfano, Calgon Corporation; Dennis J. Sherren, Enron Power Corporation

TP94-09 .......... Innovative Thinking in Water Conservation ........................................................ ............................. 1994
  Mikel E. Goldblatt, Betz Industrial

TP94-08 .......... Reuse of Industrial Waste Stream as Cooling Tower Makeup ............................................................... 1994
  Everett C. Phillips and Richard J. Strittmatter, Nalco Chemical Company

TP93-09 .......... Water Reuse Within a Refinery .............................................................................................................. 1993
  K.S. Eble and J. Feathers, Betz Industrial

WATER TREATMENT

TP18-08 .......... System Failures Unrelated to Water Chemistry ...................................................................................... 2018
  Pat Guccione, Chem-Aqua, Inc. and Adam Green, Baker, Donelson, Bearman, Caldwell & Berkowitz, PC

TP17-22 .......... Failure of Building Water Systems: How to Plan for Success and Manage Liability ......................... 2017
  Adam Green with Baker, Donelson, Bearman, Caldwell & Berkowitz, PC and Robert J Cunningham,
  Arthur Freedman Associates, Inc.

TP17-14 .......... Improved Clarification in Cooling Water Treatment by Efficient Polymer Mixing ............................... 2017
  Yong Kim, Ph.D., UGISI Solutions, Inc.

TP17-10 .......... Advantages of Mixed Oxidant Solution (MOS) in Cooling Water Systems .................................................. 2017
  Mike Dorsey, Aquacorr Services; Matt Walker, Design Controls

TP16-20 .......... Predicting the “Time to Clean”: Avoid Unscheduled Outages and Extend Asset Life Through .......... 2016
  Operational and Chemistry Modelling, Monitoring and Optimization
  Edward S. Beardwood, Solenis LLC

TP16-08 .......... A Solid Isothiazolone Biocide Microbial Growth in Industrial Water Treatment Systems ............ 2016
  Brian D. Corbin, Ph.D., The Dow Chemical Company

WINTER OPERATION

TP12-11 .......... Safe Cooling Tower Winter Operation ................................................................................................... 2012
  Michel Monjoie, Monjoie Cooling

  American Electric Power System
  Frank L. Michell and Dan H. Drew, American Electric Power

  Jean Barbaud, Electricité de France

TP84-09 .......... Cold Weather Operation of Mechanical Draft Cooling Towers ............................................................ 1984
  N.E. Dolan, Ecodyne Cooling Products

WOOD ATTACK

TP02-18 .......... Evaluation of a Simplified Procedure to Determine the Condition of Wood Cooling Tower .......... 2002
  Components
  Matthew E. Anderson, Wood Advisory Services, Inc.; Yelena S. Golod, DuPont Engineering

TP98-12 .......... Creosote Revisited ........................................................ ......................................................... 1998
  James L. Willa, Willa, Inc.
Wood Preservation and How It Pertains to the Cooling Tower Industry

Darrell R. Smith, Conrad Wood Preserving Company; Jeffrey J. Morrell, Oregon State University

ZERO DISCHARGE

Chemical Approaches to Zero Blowdown Operation

Gary E. Geiger and M.R.Hatch, Betz Industrial; J. Ogg, Stanford Linear Accelerator
